

Lasting Beauty™

Save time and money

- 3X better coverage than wood mulch
- Warranted against fading for up to 12 years
- Does not attract termites, carpenter ants or other harmful insects
- Made in the USA
- One of the safest playground coverings available
- Available in Redwood

Lasting Beauty Shredded Rubber Mulch

This realistically-textured groundcover that looks identical to wood mulch is made from 100% recycled rubber and will not fade, rot, compress or lose its original beauty, even after years of exposure to the elements. Lasting Beauty Shredded Rubber Mulch is five times heavier than wood mulches, and will not erode during heavy rains.

Installation for Landscaping

- Install Lasting Beauty Shredded Rubber Mulch at a depth of 1".
- It is not necessary, but recommended to install this mulch over a permeable weed fabric. Using a weed fabric will increase coverage per bag/box and decrease risk of weeds. Also, using felt type weed fabric will help keep Rubberific in place.
- If installing Lasting Beauty Shredded Rubber Mulch over existing mulch/soil, make sure the ground surface is a compacted material, free of debris and loose objects. This mulch will look its best when not mixed in with other debris.
- When installing Lasting Beauty Shredded Rubber Mulch in mulch/plant beds, it is recommended that the beds have a border to help contain the mulch. The border can either be a raised border such as a poured concrete/brick border, or a dug border such as a 2" deep trench around the bed.
- To clear leaves and other debris off the top of Lasting Beauty Shredded Rubber Mulch, use a blower on a low setting. Since rubber mulch is heavier than grass clippings and leaves, it will stay in place while the debris is blown away.

Installation Guidelines for Playground

- The ground area where the playground will lie should either be in location that will not hold water, or have slight grade to allow for proper drainage. In areas where drainage could be an issue; it is recommended to install a drain tile system, with a 3" base of pea gravel or rock to allow for proper drainage.
- Heavy duty weed fabric should be installed under Lasting Beauty Shredded Rubber Mulch to separate mulch from what lies beneath. Depending on the size of the playground, it is recommended to use large rolls of weed fabric (12' width rolls) to minimize the number seams.
- Use landscape stakes to stake down weed fabric seams and corners. Make sure the stakes are completely hammered down.
- A border is recommended to enclose the playground to contain the mulch. It is recommended to have a few inches between the top of the border and the top of the mulch.
- It is recommended to loosely compact the mulch to either 4 or 6 inches to achieve the desired fall height rating.
