- Durable and functional
- Long-lasting
- Made in the USA
- Available in Brown

Lasting Beauty Splash Block

Lasting Beauty Splash Blocks are light enough to move and sturdy enough to stay in place even during the heaviest of storms. Made from 100% recycled rubber, these splash blocks will not crack or chip during freeze and thaw cycles.

Installation Instructions:

- Install the splash block directly under the downspout. It should carry water at least 3 feet away from the house.
- Adjust the angle of the splash block to ensure it slopes down and away from, not toward, the house. You may need to do some digging. The ideal angle is a slope of 6 inches in 10 feet.
- Check the splash block when you are cutting grass. Avoid running over it with the mower, as this can drive it into the ground and change the angle.
- Redo the earth beneath the splash block, if necessary. The weight of the block and the pounding from the rain will cause it to settle, changing the angle over time.
