Burpee Natural and Organic Starter + Transplanting Granular Plant Food

Burpee Natural & Organic Starter + Transplanting Granular Plant Food is formulated for rapid results and is perfect for getting your garden off to a quick start. Enriched with Burpee Plant Food, mycorrhizae and beneficial microbes for superior root development and plant performance. Ideal for seed starting, bedding plants, container and vegetable gardens, trees and shrubs.

How To Use:

NEW PLANTINGS:

• SEED STARTING

When starting seeds in growing trays, kits or flats, mix 2 cups of plant food per cubic foot of seed starting mix and then fill trays up with soil. When starting seeds in-ground, mix 1 cup of plant food with native soil for every 10 square feet of seeding area. Sow seeds following packaging directions and water thoroughly.

• BEDDING PLANTS

Mix ½ cup per 10 square feet into the top 4-6 inches of native soil. Incorporate compost, peat moss, coconut coir or garden soil following packaging directions.

• CONTAINER GARDENS

When preparing new plantings for containers, mix 1 ½ cups per cubic foot of growing mix.

ESTABLISHED PLANTS:

Apply at time of planting and continue feeding monthly during the growing season.

• FLOWER BEDS

Sprinkle evenly at a rate of 4 pounds per 100 square feet. Gently work into native soil and water thoroughly.

• VEGETABLE GARDENS

Apply 1 ½ cups for every 10 feet of row length. Water thoroughly after feeding.

• CONTAINER GARDENS

Sprinkle 1.5 tsp for every 4 inches of pot diameter into the soil and water thoroughly.

• TREES + SHRUBS

Apply ¼ cup for plants with a 2 foot diameter canopy. Increase rates by ¼ cup for every additional 6 in of canopy spread. Apply at planting or in the spring and fall for established trees and shrubs.

COVERAGE: 4 pounds covers 160 square ft at .75 lbs. of nitrogen / 1,000 sq ft.
