Burpee Eco-Friendly Natural & Organic Seed Starting Mix

Burpee Eco-Friendly Natural & Organic Seed Starting Mix is a sustainable and renewable soil amendment made from coconut fiber. An ideal amendment for custom blend growing mixes for raised garden beds, container gardening and seed starting.

How To Use:

FOR STARTING SEEDS INDOORS:

1. For starting seeds, select containers with good drainage. Fill container to within 1/4" of the rim with Burpee Natural & Organic Seed Starting Mix and gently add lukewarm water to moisten.
2. Sow seeds as directed on the seed packet, taking care to plant at the recommended depth. After sowing, moisten again with a fine spray to settle the mixture around the seeds.
3. Cover with a sheet of plastic or paper until germination starts. Place the containers in a warm, well-lighted area. Water as necessary.
4. When seeds sprout, remove plastic/paper sheet and move the container immediately to a sunny windowsill, or place 3-4" below fluorescent or grow lights. Young seedlings usually require 8 hours of direct sunlight or 16 hours under grow lights. As the seedlings grow, water when the mixture surface seems dry, with enough water until water drains from the bottom.
5. After 2 weeks of growth, add a balanced, natural fertilizer.

THE BURPEE GUARANTEE

If you are dissatisfied with your purchase of this product, let us know within 3 months from date of purchase and we will refund your money. Simply send proof of purchase off the package and original register receipt to: IMC, P. O. Box 31366, Des Peres, MO 63131.
