

## Great Gardens Start Here

- Lightweight amendment improves moisture & nutrient retention
- Perfect for seed starting
- Promotes faster seed and root growth
- Improves drainage and aeration in potting mixes
- Loosens heavy soil, reducing compaction for better root development
- OMRI listed for organic use

## Burpee Natural & Organic Fine Grade Horticultural Vermiculite

Burpee Natural & Organic Fine Grade Horticultural Vermiculite is a lightweight amendment that improves moisture and nutrient retention. Vermiculite is ideal for seed starting and plant propagation. It enhances water retention, binds nutrients, and facilitates nutrient exchange.

## How To Use:

### CREATE YOUR OWN CUSTOM MIX:

#### • Seed Starting & Cuttings

Mix equal parts vermiculite and coconut coir fiber as these plantings require a light soil mixture. Sphagnum peat moss can also be used in place of coconut coir fiber.

#### • Indoor & Outdoor Containers

For a slightly denser mix for containers, mix one part vermiculite and two parts coconut coir fiber.

#### • Raised Garden Beds

For best results, mix one part vermiculite, one part coconut coir fiber and two parts compost.

### SOIL CONDITIONING:

Improve drainage and aerating in your planting areas by mixing one part vermiculite with two parts topsoil. Work into the top two inches of native soil.

### NEWLY SEEDED LAWNS:

Apply seed to lawn and cover entire area with a ¼ inch of vermiculite. Water in with a fine spray. The vermiculite will speed germination and increase the number of seeds that germinate by maintaining uniform moisture levels on the soil surface.

### BULB STORAGE:

Place bulbs in a container and pour vermiculite around them. Be careful not to pack or compress while storing bulbs. Store bulbs in a cool (45 to 55 degree Fahrenheit) dark and dry area.

### THE BURPEE GUARANTEE

If you are dissatisfied with your purchase of this product, let us know within 3 months from date of purchase and we will refund your money. Simply send proof of purchase off the package and original register receipt to: IMC, P. O. Box 31366, Des Peres, MO 63131.
