- Made in the USA

## Lasting Beauty Cobblestone Landscape Edging

The ideal edging for flower beds, gardens, walkways and patios with the stylish and classic Cobblestone design to complement any landscape.

---

### Lasting Beauty Edging installation instructions:

#### 1. Place:

- Remove stakes from the bottom of the Lasting Beauty Cobblestone Edging and set aside until installation.
- Place the edging on the ground where it will be installed.

#### 2. Prepare Ground:

- Remove the edging and make sure the installation area is free from grass and debris.
- Level the ground where the edging will be installed.

#### 3. Anchor:

- For best results during this step we recommend having two people for installation.
- Starting at one end of the edging, hammer one of the included stakes through the pre-drilled hole using a rubber mallet.
- The head of the stake should be flush with the top of the edging.
- Have the second person bend the edging while the other secures the center of the edging with another stake.
- Finally, secure the other end with remaining stake.
- Repeat until all edging is installed.

#### 4. Cutting:

- If it is necessary to make a cut, use a hacksaw or hacksaw with a miter box for best results.

**Note:** Always wear safety glasses when cutting materials.
