- Made in the USA

Lasting Beauty Cobblestone Landscape Edging

The ideal edging for flower beds, gardens, walkways and patios with the stylish and classic Cobblestone design to complement any landscape.

Lasting Beauty Edging installation instructions:

1. Place:

- Remove stakes from the bottom of the Lasting Beauty Cobblestone Edging and set aside until installation.
- Place the edging on the ground where it will be installed.

2. Prepare Ground:

- Remove the edging and make sure the installation area is free from grass and debris.
- Level the ground where the edging will be installed.

3. Anchor:

- For best results during this step we recommend having two people for installation.
- Starting at one end of the edging, hammer one of the included stakes through the pre-drilled hole using a rubber mallet.
- The head of the stake should be flush with the top of the edging.
- Have the second person bend the edging while the other secures the center of the edging with another stake.
- Finally, secure the other end with remaining stake.
- Repeat until all edging is installed.

4. Cutting:

- If it is necessary to make a cut, use a hacksaw or hacksaw with a miter box for best results.

Note: Always wear safety glasses when cutting materials.
