- 6 pounds covers 500 sq. ft.

Burpee Natural Quick Action GardenLime™

Burpee Natural Quick Action GardenLime is a fast-acting, low dust pelletized lime that helps raise calcium levels and soil pH for ideal growing conditions. Low soil pH can cause poor fertilizer response and increase potential for weeds, moss and thatch. Applying Burpee GardenLime is an easy way to balance soil pH for delicious vegetables and beautiful flowers.

How To Use:

Apply Burpee Natural Quick Action GardenLime in early Spring or Fall to help manage soil pH. Always remember to water thoroughly after application. Burpee GardenLime may be applied in conjunction with garden or lawn fertilizer products. For best results, incorporate into top 2 inches of soil.

VEGETABLE GARDENS + FLOWER BEDS:

To maintain soil pH in vegetable gardens and flower beds apply 3 lbs per 500 sq.ft.

To increase soil pH and increase calcium levels, apply 6 lbs per 500 sq.ft.

TREES, SHRUBS + ORNAMENTALS:

To maintain soil pH in large landscape areas, apply 3 lbs per 500 sq. ft.

For individual plants, apply ¼ cup evenly around the base of the plant.

To increase soil pH and calcium levels in large landscape areas, apply 6 lbs per 500 sq. ft. For individual plants, apply ½ cup evenly around the base of the plant.

LAWNS:

To maintain soil pH in lawns, apply 3 lbs per 500 sq.ft.

To increase soil pH and increase calcium levels, apply 6 lbs per 500 sq.ft.
