Playground Installation Guidelines

- The ground area where the playground will lie should either be in location that will not hold water, or have slight grade to allow for proper drainage. If drainage could be an issue; it is recommended to install a drain tile system.
- Heavy duty weed fabric should be installed under mulch to separate mulch from what lies beneath.
- Use landscape stakes to secure weed fabric.
- A border is recommended to enclose the playground to contain the mulch.
- Compacting mulch to either 4, 5, or 6 inches to achieve the desired fall height rating is recommended.

Available in Mocha Brown, Cedar Red, Espresso Black, Green and Blue.
