SMARTLOC™  
For Quick &  
Secure Fit

GroundSmart SmartLoc Rubber Pavers are the perfect surfacing to bring new life to patios, decks and floors. Made from 100% recycled rubber, GroundSmart Rubber Pavers provide long-lasting beauty, and won't freeze or crack in harsh weather. If you are looking for ease of installation, then GroundSmart SmartLoc pavers are the right choice for a quick and secure fit.

### Installation Instructions

- Thoroughly clean the surface where the pavers are to be installed. Allow to dry completely. Make sure that both paver and surface have no moisture on them for best adhesion.
- Place the paver on surface to assure you have the right quantity of pavers and you like the overall design.
- For best results, create chalk lines as a guide for pavers to be straight during installation.
- Begin installation in a corner or against a wall and work in a small section.
- Apply a polyurethane adhesive to the bottom of the paver and place on the surface.
- Gently connect and tap tiles into place with a rubber mallet for adhesion to the surface. Continue this process until you have successfully glued all pavers to your surface.
- For any pavers that require cutting, use a razor knife. Cutting the paver in a series of scores to acquire a clean edge.
- Allow the area to dry for a minimum of 24 hours.
