16" Dual-Sided Rubber Paver

Available in Tan, Red and Gray

Made from 100% recycled rubber, our line of GroundSmart Rubber Pavers take minutes to install for years of maintenance-free beauty. With long-lasting color and durability, our rubber pavers will not budge in rain or wind, but are still light enough for you to carry.

GroundSmart recycled rubber pavers are the perfect surfacing to bring new life to patios, decks and porches. GroundSmart rubber pavers provide long-lasting beauty, being durable enough to never freeze or crack. With multiple designs and colors, there is no better choice to update your backyard.

Installation Instructions

- Thoroughly clean the surface where the pavers are to be installed. Allow to dry completely. Make sure that both paver and surface have no moisture on them for best adhesion.
- Place the paver on surface to ensure you have the right quantity of pavers and you like the overall design.
- For best results, create chalk lines as a guide for pavers to be straight during installation.
- Begin installation in a corner or against a wall and work in a small section.
- Apply a polyurethane adhesive to the bottom of the paver and place on the surface.
- Gently tap tiles into place with a rubber mallet for adhesion to the surface. Continue this process until you have successfully glued all pavers to your surface.
- For any pavers that require cutting, use a razor knife. Cutting the paver in a series of scores to acquire a clean edge.
- Allow the area to dry for a minimum of 24 hours.
